UiPath AI Monitoring API

1.0.0 OAS 3.1

/openapi.json

ML + Groq AI-powered UiPath log error detection service

default

GET /health Health

Parameters

Cancel

No parameters

Execute Clear

Responses

Curl

```
curl -X 'GET' \
  'http://127.0.0.1:8000/health' \
  -H 'accept: application/json'
```

Request URL

```
http://127.0.0.1:8000/health
```

Server response

Code	Details

POST `/predict` Predict

Classify a log entry (ML only, no Groq).

Parameters Cancel Reset

No parameters

Request body required application/json

```
{
  "timestamp": "2024-06-15 14:35:22",
  "log_level": "ERROR",
  "process_name": "SAPIntegration",
  "robot_name": "Robot_001",
  "message": "Error occured while getting Incoming GoFormz AM Mails - exception:    at
UiPath.Mail.OutlookAPI.GetMessages(MAPIFolder inboxFolder, Int32 count, MailFilterVariant
filterVariant, EOrderByDate orderByDate,",
  "exception_type": "ApplicationException",
  "exception_message": "UiPath.Mail.OutlookAPI.GetMessages(MAPIFolder inboxFolder",
  "duration_ms": 25000,
  "retry_count": 1
}
```

Execute | Clear

Responses

Curl

```
curl -X 'POST' \
  'http://127.0.0.1:8000/predict' \
  -H 'accept: application/json' \
  -H 'Content-Type: application/json' \
  -d '{
  "timestamp": "2024-06-15 14:35:22",
  "log_level": "ERROR",
  "process_name": "SAPIntegration",
  "robot_name": "Robot_001",
  "message": "Error occured while getting Incoming GoFormz AM Mails - exception:    at UiPath
  "exception_type": "ApplicationException",
  "exception_message": "UiPath.Mail.OutlookAPI.GetMessages(MAPIFolder inboxFolder",
  "duration_ms": 25000,
  "retry_count": 1
}
'
```

```

Server response

Code	Details
200	

Response body

```
{
  "is_error": true,
  "confidence": 0.9905,
  "groq_analysis": "## Root Cause Analysis\nThe root cause of the error is a
n exception in the `UiPath.Mail.OutlookAPI.GetMessages` method, which is use
d to retrieve incoming emails from Outlook. This suggests a potential issue
with the Outlook API or the email account configuration. The `ApplicationExc
eption` indicates a generic error that may be related to authentication, con
nectivity, or data retrieval.\n\n## Likely Business Impact\nThe likely busin
ess impact is that the SAPIntegration process will fail to retrieve incoming
emails from GoFormz AM Mails, potentially causing delays or disruptions in t
he automation workflow. This may lead to missed or delayed processing of cri
tical business data, resulting in financial losses or reputational damage.\n
\n## Recommended Fix\nTo resolve the issue, follow these concrete steps:\n1.
**Verify Outlook API credentials**: Ensure that the Outlook API credentials
used in the automation are valid and have the necessary permissions.\n2. **C
heck email account configuration**: Confirm that the email account settings
are correct, including the inbox folder and mail filter variant.\n3. **Updat
e UiPath.Mail package**: Ensure that the UiPath.Mail package is up-to-date,
as newer versions may resolve known issues.\n\n## Prevention Strategy\nTo pr
event similar issues in the future:\n1. **Implement robust error handling**:
Develop a comprehensive error handling mechanism to catch and log exception
s, allowing for quicker identification and resolution of issues.\n2. **Regul
arly review and update dependencies**: Schedule regular reviews of dependenc
ies, such as the UiPath.Mail package, to ensure that the latest versions are
used.\n3. **Monitor automation performance**: Continuously mo
ation workflow's performance and log entries to detect potent
re they cause significant business impact."
